Market Visit to Algeria (Multi-Sector)

30 November - 3 December 2014

At the crossroad of Africa and the Middle East, Algeria has real potential as a market for UK companies. Following the visit of the Lord Mayor of the City of London to Algiers in June 2014, this visit will enable you to learn more about business opportunities in this country.

One of the wealthiest countries in Africa, Algeria has more than £200 billion of foreign exchange reserves. Opportunities exist in a wide range of sectors: technology, financial services, telecommunication, energy (including renewable), transport, and security products & services.

Renowned for its energy production, Algeria also seeks to bring about innovation across sectors by better integrating telecommunications systems and harmonising financial services to benefit the region.

This is a chance for you to present your products, meet Government officials and benefit from introductions in an untapped market.

The programme will entail meetings with the British Ambassador and local ministers, as well as with major national companies and partners. You will also have the opportunity to arrange one-to-one meetings with businesses in your area of interest and you will learn more about available opportunities and development potential.
